

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class X Income Shares (ISIN IE00BDV09S08) (GBP)

London & Capital Global Star Equity Fund (the 'Fund'), a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objective and Investment Policy

The investment objective is to seek to provide growth through investments in a full range of global equities (meaning shares in companies).

The Fund is considered to be actively managed in reference to the MSCI AC World Local Index (the "Index") by virtue of the fact that the Fund uses the Index as a performance target whereby the Fund seeks to produce longer term absolute total returns with lower volatility than the Index. The Index is deemed a measure of global equity returns. However, the Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in holdings which do not form part of the Index.

Investments will be made in what the Investment Manager considers to be 'star equities': that is listed equity instruments of companies headquartered in western markets (i.e. North America, the UK and Western Europe) where the company has a strong franchise, low leverage (meaning low borrowings), sound fundamentals (in terms of its business offering and its industry) and a solid shareholder yield track record (meaning the growth or dividends which it has generated for its shareholders).

The Fund will generally invest on the basis of its view that the value of a security will grow over the medium term and use a proper country and sector allocation in order to provide a proper diversification

and avoid excessive risk concentration in particular areas.

The Fund may gain exposure to markets which are less developed in terms of their financial markets (known as emerging markets), yet will do so only via western-headquartered securities with a significant part of their revenues generated in those economies.

The Fund may invest up to 10% of its net assets in aggregate in other collective investment schemes.

The Fund may use FDIs (including exchange-traded futures, options and swaps) and may enter into securities lending agreements. The use of derivatives will involve leverage.

The Company may, at its discretion, declare dividends (i.e. income arising from your Shares).

You may buy and sell your Shares on any day on which banks in the United Kingdom and Ireland are open for normal business.

For full investment objective and policy details as well as subscription and redemption policies please refer to the 'Investment Objective and Policies', 'Issue of Shares' and 'Redemption of Shares'.

Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard risk/ reward category scale.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is categorised as a 5 because it is invested in a full range of global equities.

The following are risks materially relevant to the Fund which are not adequately captured by the indicator:

Derivative (financial techniques) Risk: The Fund is entitled to use derivative instruments for efficient portfolio management. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund. The Fund may enter into various financial contracts (derivatives) with another party. There is a risk that this party will become insolvent or fail to make its payments which may result in the Fund and your investment suffering a loss. Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

Further details of risks associated with an investment in the Fund are set out in the Prospectus and the Supplement under the heading 'RISK WARNINGS'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One off charges deducted before or after you invest	
Entry charge 5.00%	This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.
Exit charge None	
Charges taken from the Fund over a year	
Ongoing charges: 0.19%	
Charges taken from the Fund under certain specific conditions	
Performance Fees: None	

The entry and exit charges shown are maximum figures. In some cases you might pay less.

The on-going charges shown are based on the year ending 31 December 2020 but may vary from year to year.

It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling another collective investment undertaking.

An anti-dilution levy of 2% may be charged on redemptions of 5% or greater of the total assets of the Fund.

For more information about charges, please refer to the 'Fees and Expenses' section of the Prospectus and the Supplement.

Past Performance

The past performance shown in the chart opposite takes into account all charges.

Past performance shown is not a guide to future performance.

Past performance has been calculated in the base currency of the Fund which is US Dollars.

The Fund compares its performance in the chart opposite to the MSCI AC World Local Index.

The Fund was approved by the Central Bank of Ireland on 29 November 2013 and the share class was launched on 13 December 2013.
