Class X Income Shares USD (ISIN IE00BDV0B733)

London & Capital Global Bond Fund (the 'Fund'), a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to seek to provide absolute growth through investments in a full range of global fixed income securities including government bonds and corporate bonds with the aim of producing balanced investment returns with a relatively low level of volatility (below 8% over a business cycle).

The Fund is considered to be actively managed in reference to the Federal Funds Target Rate Mid-Point of Range Plus 2%, the UK Bank of England Official Bank Rate plus 2% and the ECB Deposit Facility Announcement Rate plus 2% (the "Benchmarks") by virtue of the fact that it uses the Benchmarks for performance comparison purposes. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.

The global fixed income securities (which are securities that provide the Fund with a predictable income return, together with changes in its capital value) that the Fund will invest in will be listed on one of more of the exchanges set out in Appendix 2 to the Company's Prospectus.

The weighted average credit quality (meaning the credit rating of all of its investments when taken together) of the Fund will be investment grade (i.e. at or above S&P rating BBB – or equivalent). Part of the exposure to credit may also include an allocation to

sub-investment grade securities (a maximum of 40% of the Fund's Net Asset Value), but the overall Fund's minimum of BBB- rating equivalent will be observed.

A maximum of 20% of the portfolio may be held in fixed income securities that are denominated in emerging market currencies. The Fund may invest up to 10 % of its net assets in aggregate in other collective investment schemes.

The Fund may adopt specialist financial techniques (using instruments known as derivatives, including exchange-traded futures, options and swaps) and may enter into securities lending agreements to manage credit and duration risk of the Fund. The use of derivatives will involve leverage.

The Company may, at its discretion, declare dividends (i.e. income arising from Shares will be paid out, subject to Directors approval).

You may buy and sell your Shares on any day on which banks in the United Kingdom and Ireland are open for normal business.

For full details please refer to the 'Investment Objective and Policy', 'Issue of Shares' and 'Redemption of Shares' sections of the Supplement and 'The Shares' section of the Prospectus.

Risk and Reward Profile

lower potential risk/rewards

higher potential risk/rewards

The indicator above illustrates the position of this Fund on a standard risk/ reward category scale.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is categorised as a 4 because it is invested in a broad spectrum of global investment grade and high yield corporate and government bonds.

The following are risks materially relevant to the Fund which are not adequately captured by the indicator:

Credit Risk: There is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.

Sub-Investment Grade Risk: Investment in sub-investment grade fixed interest securities involves greater price volatility and risk of loss of principal and income than investment in fixed income securities of a higher investment grade quality.

Derivative (financial techniques) Risk: The Fund is entitled to use derivative instruments for efficient portfolio management. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund. The Fund may enter into various financial contracts (derivatives) with another party. There is a risk that this party will become insolvent or fail to make its payments which may result in the Fund and your investment suffering a loss. Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

For a more detailed explanation of the risks, please refer to the "Risk Factors" section of the Prospectus and "Risk Warnings" section of the Supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One off charges deducted before or after you invest	
Entry charge None	This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.
Exit charge None	
Charges taken from the Fund over a year	
Ongoing charges: 0.28%	
Charges taken from the Fund under certain specific conditions
